

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Original) An organic photovoltaic component comprising a substrate, a positive electrode, an organic semiconductor and a negative electrode, wherein said substrate and/or one or more additional transport layer(s) between said electrode and said semiconductor layer is (are) structured.
2. (Original) The organic photovoltaic component as defined in claim 1, wherein said substrate is a flexible sheet that is structured.
3. (Currently Amended) The organic photovoltaic component ~~as defined in one of the preceding claims~~ of claim 1, wherein said substrate and/or an additional layer above or below said semiconductor layer is structured.
4. (Original) A method for structuring the semiconductor layer of a photovoltaic component by preserving an existing structure of a lower layer to which said semiconductor layer is applied.
5. (Original) The method as defined in claim 4, wherein said semiconductor layer planarizes the structure of said lower layer(s).
6. (Currently Amended) The method as defined in ~~either of claims 4 and 5~~ claim 4, wherein said structuring is effected by introducing an additional layer.
7. (New) A photovoltaic cell, comprising:
 - a substrate;
 - a first electrode supported by the substrate;

a second electrode;
an organic semiconductor between the positive and negative electrodes,
wherein the substrate is structured.

8. (New) The photovoltaic cell of claim 7, wherein the substrate is flexible.
9. (New) The photovoltaic cell of claim 7, wherein the first electrode is structured.
10. (New) The photovoltaic cell of claim 9, wherein the first electrode is disposed on the substrate.
11. (New) The photovoltaic cell of claim 9, wherein the first electrode is a cathode.
12. (New) The photovoltaic cell of claim 7, further comprising a planarized layer between the substrate and the first electrode.
13. (New) The photovoltaic cell of claim 12, wherein the first electrode is disposed on the substrate.
14. (New) The photovoltaic cell of claim 7, further comprising a planarized layer between the organic semiconductor and the first electrode.
15. (New) The photovoltaic cell of claim 14, wherein the first electrode is disposed on the substrate.
16. (New) A photovoltaic cell, comprising:
 - a substrate;
 - a first electrode supported by the substrate;
 - a second electrode;
 - an organic semiconductor between the positive and negative electrodes,
 - wherein the first electrode is structured.

17. (New) The photovoltaic cell of claim 16, wherein the substrate is not structured.
18. (New) The photovoltaic cell of claim 16, further comprising a first layer supported by the first electrode, the additional layer being structured.
19. (New) The photovoltaic cell of claim 18, further comprising a second layer supported by the first layer, the second layer being planarized.
20. (New) The photovoltaic cell of claim 16, wherein the substrate is flexible.
